Williams Sound Pocket-Talker Pro

\$250.00

Versatile and high quality Personal Amplifier suitable for one-to-one conversations, meetings and consultations.

This easy-to-use, portable amplifier can improve your ability to communicate in difficult listening situations, whether you're talking in a one-on-one situation or in a group. The PockeTalker Pro takes advantage of the nature of sound, bringing the sound source closer to the listener (improving the signal-to-noise ratio), which helps to overcome distracting background noise.

The PockeTalker Pro features internal tone and gain controls adjustable by your audiologist to match your hearing ability.

Take the PockeTalker Pro anywhere:

- One-on-one conversations
- Indoor/outdoor activities
- In the car
- TV or radio listening
- Restaurants or small groups

PockeTalker Pro includes:

- PockeTalker Pro amplifier
- Deluxe folding headphone
- AA rechargeable batteries
- AC Adapter/Charger
- Plug mount microphone
- TV listening extension cord
- Belt clip case
- System carry case

See *Assistive Listening Accessories* section of the e-store for optional earphone/headset choices for use with the PockeTalker Pro.

**Williams Sound
PockeTalker Personal
Amplifier**

\$215.00

The PockeTalker Personal Amplifier amplifies sounds clearly and easily for better understanding.

Adjust the volume and tone control on the Personal Amplifier to best suit your needs. Ideal for one-on-one conversations, small groups, listening in the car, TV listening and much more. With this portable, sleek compact design, you can take it anywhere.

PockeTalker Personal Amplifier includes:

- PockeTalker amplifier
- Headset
- AA batteries
- Plug mount microphone
- TV listening extension cord
- Belt clip

See Assistive Listening Accessories section for optional earphone/headset choices for use with the PockeTalker Personal Listener.

**Sonic Technology Super
Ear Plus 6000**

\$69.95

The Super Ear Plus Personal Sound Amplifier is easy-to-use, portable and ideal for one-on-one conversations or small meeting groups.

The Super Ear Plus 6000 features a volume control wheel located on the headphone lead wires, which permits easy volume adjustment. It's built in microphone swivels to increase directionality.

Super Ear Plus 6000 includes:

- Super Ear Plus amplifier
- Comfortable, lightweight stereo headphones
- Stereo "earbud" type earphones
- 30 minute Automatic Shut-off to conserve battery life
- 2-AAA alkaline batteries (provides up to 80 hours of operation)

Sennheiser Audioport 200

\$305.00

Personal Sound Amplifier which can improve your ability to communicate in difficult listening situations.

For better hearing at family gatherings, the doctor's office or a conference, this stereo personal amplifier allows you to hear every word loud and clear. Due to the stereo amplification through microphones on each ear, the user can determine the direction of the sound source. The volume to each ear can be balanced to suit your hearing needs. The Audioport 200 is comfortable to wear and its long battery life means that you can enjoy its benefits all day long.

Audioport 200 Includes:

- Audioport 200 amplifier
- Rechargeable accupak (battery)
- Charger
- Set of spare ear-cushions

Sennheiser Infraport Set 810

\$385.00

Enjoy TV at the volume you choose with the Infraport Set 810 which uses state-of-the-art infra-red technology to deliver sound of the highest quality.

If your listening needs are different from the other members of your family, you need the Infraport Set 810. The ergonomically designed, lightweight headphones can be operated even by those with dexterity difficulties. With a range of up to 12 meters, the system is also well suited for use in large rooms, and the stereo sound guarantees excellent sound representation. A second battery charging compartment allows you to charge two batteries alternately - to make sure that you can go on listening even beyond the 4-5 hours that a single battery provides.

Infraport Set 810 includes:

- Infraport headphone receiver
- Infraport transmitter/charging unit
- Rechargeable accupak (battery)
- Set of spare ear-cushions
- Cable connections to TV/audio equipment
- Microphone (allows use of system on any TV, even those not equipped with an audio output jack)

Sennheiser Infraport 810S Pendant Receiver Set

\$428.00

Enjoy TV at the volume you choose with the Infraport Set 810S. Using infrared technology, this wireless system connects easily to your TV set or other audio equipment to deliver sound of the highest quality.

Pendant style Receiver

The Infraport Set 810S uses infrared technology to deliver sound of the highest quality. The Pendant Receiver is designed specifically for use with hearing aids or an alternative headset. Connect a neck loop (requires the user to have a hearing aid with a T-switch), hearing aid boot, or alternative headphone and adjust the volume control to the sound level required and TV viewing with family and friends becomes a pleasure once more. With a range of up to 12 meters, the system is also well suited for use in large rooms, and the stereo sound guarantees excellent sound representation.

	<p>Infraport Set 810S includes:</p> <ul style="list-style-type: none"> • Infraport pendant receiver • Infraport transmitter/charging unit • Rechargeable accupak (battery) • Cable connections to TV/audio equipment • Microphone (allows use of system on any TV, even those not equipped with an audio output jack). <p>Note: Headset sold separately.</p> <p>See <i>Assistive Listening Accessories</i> section for optional earphone/headset choices for use with the Sennheiser Infraport 810S Pendant Receiver Set</p>
<p>Sennheiser RF Set 820</p>  <p>\$405.00</p>	<p>Enjoy TV at the volume you choose with the Sennheiser Set 820. Using RF technology this system connects easily to your TV set or other audio equipment to deliver sound of the highest quality.</p> <p>The Sennheiser Set 820 is an RF wireless audio transmission system. The transmitter has a range of up to 100 ft which allows you to move around freely – without the constriction of cables. The system uses RF audio signals for sound transmission. Therefore it is not necessary that the transmitter and stethoset (headphone) receiver are in a direct line of sight. The ergonomically designed, lightweight headphones have a large, easy-to-use volume control which can be operated even by those with dexterity difficulties. Place the stethoset receiver on the transmitter for quick charging.</p> <p>Sennheiser Set 820 includes:</p> <ul style="list-style-type: none"> • RF stethoset headphone receiver • RF Transmitter/charging unit • Rechargeable accupak (battery) • Set of spare ear-cushions • Cable connections to TV/audio equipment • Microphone (allows use of system on any TV, even those not equipped with an audio output jack)

Sennheiser RF Set 820S Pendant Receiver Set

\$439.00

Enjoy TV at the volume you choose with the Sennheiser Set 820S. Using RF technology this system connects easily to your TV set or other audio equipment to deliver sound of the highest quality.

Pendant style receiver

The Sennheiser Set 820S is an RF wireless audio transmission system. The transmitter has a range of up to 100ft which allows you to move freely - without the constrictions of cables. The Pendant Receiver is designed specifically for use with hearing aids or an alternative headset. Connect a neck loop (requires the user to have a hearing aid with a T-switch), hearing aid boot, or alternative headphone and adjust the volume control to the sound level required and TV viewing with family and friends becomes a pleasure once more. The system uses RF audio signals for sound transmission. Therefore it is not necessary that the transmitter and pendant receiver are in a direct line of sight. Place the pendant receiver on the transmitter for quick charging.

Sennheiser Set 820S includes:

- RF pendant receiver
- RF transmitter/charging unit
- Rechargeable accupak (battery)
- Cable connections to TV/audio equipment
- Microphone (allows use of system on any TV, even those not equipped with an audio output jack)

Note: Listening Accessory (headphone/neckloop, etc) sold separately.

See *Assistive Listening Accessories* section for optional headset choices for use with the Sennheiser Set 820S Pendant Receiver Set.

Sennheiser Infrared TV Listening Set 50

\$ 199.00 + gst

Enjoy TV at the volume you choose with the Sennheiser infrared Mono Set 50. This system consists of an infrared mono stethoset receiver and infrared transmitter and is ideal for receiving TV sound within a room. The receiver features an on/off/volume switch and a balance control. The transmitter can be quickly connected to a TV set or hi-fi system and transmits quality sound within a room, up to a distance of 12 meters.

Sennheiser Set 50 Features: I

- Ideal for TV sound transmission
- Cordless infra-red system with excellent sound quality
- Balance control on the headphones for separately setting the volume level for the left and right ear
- NiMH rechargeable battery ("accupack") for more than 9 hrs. of audio enjoyment
- Very lightweight stethoset headphones, extremely comfortable to wear even for extended listening

Infrared Set 50 includes:

- Infrared stethoset headphone receiver
- Infrared transmitter/charging unit
- Rechargeable accupack (battery) – BA151
- Set of spare ear cushions
- Connections cable with two 3.5mm stereo jack plugs
- RCA adaptor
- adaptor to 1/4" jack socket

Sennheiser Infrared TV Listening Set 410

\$ 279.00 + gst

The Sennheiser IS 410 is an ultra-lightweight infrared stereo stethoset headphone system, enabling the user to individually adapt the volume of TV sets, radios and hi-fi systems to his or her hearing ability. The transmitter is easily connected to this equipment and transmits crystal-clear audio within a room.

Operation of the stethoset headphone system is easy and intuitive, with the headphones switching on automatically when they are put on. Balance and volume are set directly on the stethoset headphones. The transmitter features a compression button for further enhancing speech intelligibility.

Sennheiser Set IS 410 Features:

- Ideal for TV sound transmission
- Cordless infra-red system with excellent sound quality

- Transmits sound within a room, at a distance of up to 12 meters
- Balance control on the headphones for separately setting the volume level for the left and right ear
- Compression function ensures superior speech intelligibility
- Lithium-Ion rechargeable battery pack ("accupack") for more than 16 hrs. of audio enjoyment
- Headphones automatically switch on and off when they are put on/removed
- Very lightweight stethoset headphones, extremely comfortable to wear even for extended listening

Infrared Set IS 410 includes:

- Infrared stethoset headphone receiver
- Infrared transmitter/charging unit
- Rechargeable accupack (battery) – BA300
- Set of spare ear cushions
- Connections cable with two 3.5mm stereo jack plugs
- RCA adaptor
- adaptor to 1/4" jack socket

Sennheiser Battery BA151

\$34.00

Replacement battery for Sennheiser Set 810, Set 810S, and Audioport

Phonic Ear / Oticon Amigo Personal FM System

\$ 1,100.00

The Amigo T5/R5 is a cost effective, body-worn FM solution that uses manual channel selection on both the transmitter and receiver. Easy to use, lightweight and portable, the Amigo T5/R5 FM System can accompany you virtually anywhere to satisfy your listening needs.

The speaker wears a compact, wireless transmitter and microphone, while the listener uses a portable, wireless receiver with their choice of listening accessory. Whether your application is at home or school, work or play, the Amigo T5/R5 FM system can make your listening easier and more comfortable than before.

	<p>Oticon Amigo T5/R5 includes:</p> <ul style="list-style-type: none"> • FM multi-channel Transmitter (T5) • FM multi-channel Receiver (R5) • Lapel microphone • AAA rechargeable batteries • Dual unit battery charger • Carrying Case <p>Note: Listening Accessory (headset) sold separately</p>
<p>Williams Sound Hearing Helper Personal Amplifier/FM System</p>  <p>\$1,054.00 + gst</p>	<p>Personal Amplification System and FM System All In One!</p> <p>The Hearing Helper System helps listeners overcome background noise, and distance from the speaker in classrooms and small groups, thus maximizing the ability to hear. FM system technology transmits sound via radio waves. The speaker wears a compact, wireless transmitter and microphone, while the listener uses a portable, wireless receiver with their choice of headset. Those with hearing aids equipped with a telecoil (T-switch) can use a neck loop. The portable receiver includes an environmental microphone which helps users listen to themselves or those near them.</p> <p>Disengage the transmitter, and the system turns into a personal amplification system that can be taken virtually anywhere, to be used for one-on-one communication or in small group settings.</p> <p>Hearing Helper Personal Amplifier/FM system includes:</p> <ul style="list-style-type: none"> • FM Transmitter • FM Receiver • Lapel microphone • Environmental microphone • Mini earphone (single bud) • Soft carrying case • Belt clip cases (2) • Drop-In Charger • 4AA rechargeable batteries <p>See <i>Assistive Listening Accessories</i> page for optional earphone/headset choices for use with the Hearing Helper Personal Amplifier/FM System.</p>
